

YSGOL GOLWG PEN Y FAN NEW BUILD NEWSLETTER

This newsletter will provide updates on the development of a replacement building for Ysgol Golwg Pen y Fan. Further updates will be shared throughout the development of the new building.

Contractor Appointed

Following a tendering process carried out earlier this year, Willmott Dixon has now been appointed as the main contractor for the project to provide a new building for Ysgol Golwg Pen y Fan.

Appointing a contractor is a really significant milestone in this project and will ensure the work can move forward at pace.

Willmott Dixon brings significant experience in delivering high-quality educational facilities, and we look forward to working closely with them as the project progresses.

Design Development

Following the appointment of Willmott Dixon as design and build contractor for this project, we are currently working with them on the early design stages for the new building.

A series of design workshops have taken place to help shape the new school. These have included meetings with the school's Headteacher, Deputy Headteacher and Chair of Governors.

Early plans have also been shared with school staff to ensure their input is reflected as the design evolves.

Site Surveys

In addition to the design work which is ongoing, a range of surveys are currently being undertaken on the former Brecon High School site where the new building will be located.

These are an important part of the process and will help inform the design and ensure the new building is well suited to its surroundings.

What Will Happen Next

Over the coming months, the design team will continue to develop the proposals in more detail. This will include refining the layouts, reflecting the feedback received to date, and progressing towards the next stage of the design process.

We will also explore opportunities to involve learners and keep them updated as the project progresses, to ensure that they are part of this exciting journey.

We will continue to keep you updated as the project moves forward and key milestones are reached.
